Laadukkaat Varax®-tuotteet valmistetaan kotimaisilta ja eurooppalaisilta toimittajilta tilatuista, huolella valituista, raaka-aineista. Ennen jauhemaalausta kalusteiden teräsputket esikäsitellään Bonderite NT:llä, joka antaa paremman korroosiosuojan kuin normaali rautafosfointi. Käytämme polyesterijauhetta, joka ei sisällä liuotteita ja joka soveltuu ulkokäyttöön ja antaa putkille kulutusta kestävä pinnan. Maalaus suoritetaan suljetussa järjestelmässä joten jätettä ei synny.

Varax® är en finländsk högkvalitativ produkt tillverkad av omsorgsfullt utvalda råvaror från ledande inhemska och europeiska leverantörer. Innan pulvermålningen förbehandlas möblernas stålrör med hjälp av Bonderite NT, som ger ett högre korrosionsskydd än vanlig järnfosfatering. Vi använder polyesterpulver, som är fritt från lösningsmedel och lämpar sig för utomhusbruk samt ger rören en slitstark yta. Målningen utförs i ett slutet system och därför uppstår heller inget avfall.

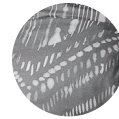

Varax® is a Finnish product. The raw materials are carefully chosen from leading domestic and European suppliers. We pretreat our furniture's steel pipes with Bonderite NT prior to powder coating, which provides superior protection against corrosion than a conventional iron phosphate coating. We also use a solventfree polyester powder suitable for outdoor use that ensures a durable surface. A closed system is used during painting, ensuring that no waste products are produced.
